

NOTICE

AVOID DIRECT CONTACT WITH BIRDS.

Do NOT feed, touch, or remove birds from the area. Walk cautiously where birds gather to avoid bird feces.

If you see 5 or more sick or dead birds, report it to the NJ DEP Fish & Wildlife Office by scanning the QR code or go to <https://tinyurl.com/y2vvmxt3>.

Wild birds may carry Highly Pathogenic Avian Influenza (HPAI) H5N1, also known as bird flu. HPAI mainly spreads among birds but may infect humans or pets. You can reduce your risk of infection by avoiding areas with sick or dead birds and keeping your pets away from them.

For more information on H5N1 bird flu, visit: www.nj.gov/H5N1/
